Are you...

Diabetic?
Looking to
lose weight?

Have you considered participating in a clinical study?

Participating in a clinical trial can help improve treatment options for you and other people with excess body weight and type 2 diabetes (T2D).

In this study we will be looking into whether a new investigational dose of semaglutide can help lower body weight in people living with excess body weight and T2D.

You may qualify to participate in this clinical trial if:

- You are willing to inject study medicine once a week for 72 weeks
- You are 18 years old or older
- You are diagnosed with Type 2 Diabetes
- You have a minimum Body mass index (BMI) \geq 30.0
- You have experienced at least one unsuccessful dietary effort to lose weight

What are the benefits of being involved in this investigational study?

- Study-related care, including regular health check-ups
- Regular talks with a dedicated team of doctors and nurses
- Guidance on healthy lifestyle choices

THIS STUDY IS CURRENTLY RECRUITING
