

A clinical research study for people with type 2 diabetes and excess weight who are at risk for heart disease or stroke

ACHIEVE-4

ANY PEOPLE DEPICTED IN THIS ADVERTISEMENT ARE MODELS AND THE IMAGES ARE BEING USED FOR ILLUSTRATIVE PURPOSES ONLY

ACHIEVE-4 is a clinical research study for people with type 2 diabetes and excess weight who are at risk for heart disease or stroke.

The study will test how safe and well the investigational medicine (the medicine being studied) works for blood glucose and weight management compared with insulin therapy.

Can I join this study?

Yes, you may be able to join the research study if you:

- » Are aged 18 years or over
- » Have type 2 diabetes and are taking at least 1 medicine to manage your diabetes
- » Have a BMI* of 27 or higher
- » Have or are at risk for heart disease, stroke, or other blood vessel diseases, or have kidney disease

***BMI** stands for **body mass index**. If you do not know your BMI, please contact a healthcare professional.
